Online Video Cutter
This web app comes in handy when you need to cut a small video file. It does not require installation, and it works in your browser.

Any format you can think of
The app supports almost every video format out there. If your file fails to open, then it is probably damaged or it is too big.

Crop video
Cropping allows you to frame the video to the desired area or change frame proportions.

Easy video trimming
After uploading your file, you can choose the quality and format of the output file. There are no complicated controls – every feature is just one or two clicks away.

Rotate video
You can rotate your video 90, 180 or 270 degrees. It can be useful when a portrait scene was shot in a landscape mode or vice versa.

Security guaranteed
Your files are automatically deleted from our servers a few hours after you are done working with them. Nobody has access to them except you.

Narrated PowerPoint

- Prepare your slides

The screenshot displays the Microsoft PowerPoint interface. The 'Slide Show' tab is selected in the ribbon, and the 'Record Slide Show' button is highlighted with a blue box. A tooltip for 'Start Recording from Beginning' is visible, stating: 'Record narrations, ink, laser pointer gestures, and slide and animation timings for playback.' The main slide area shows a slide titled 'Narrated PowerPoint' with a large green 'PLAY' button. A smaller inset window within the slide area shows a list of recording options: 'Start Recording from Beginning', 'Start Recording from Current Slide', and 'Start Recording from Selected Slides'. The taskbar at the bottom shows the system clock at 21:37 on 1/21/2021.
